

# Jubilee House Respite and Short Breaks

Jubilee House has three bedrooms available for respite and short breaks. All rooms are located on the upper floor with passenger lift access. Rooms have wash hand basins and are closely located to a bathroom, shower room and toilet.

The home has a nurse call system fitted which includes a pendant system and is linked in the door entry system. This means you are safe and secure in the home and around the grounds.

We encourage people new to the service to visit the home prior to your stay. At this time you can get a feel for the home and the Care Manager will discuss your care needs, so that we can ensure that your stay is comfortable and

supportive.

Bookings for our service should be made through the STARR team (contact details below) who will pass on all the information that we require.
